# RING SIZE

## 1st Method

to find your ring size you will have to print the ring size table wich is located in the following page.

Print this page disabling "fit to page" and choosing print 100%.

To make sure that the you printed is right use a ruler to measure the following sample:

0cm          2cm

If the measurement is 2cm, it is correct.

If you have a ring that fits your finger, place it on the circle diagram. Find wich circle matches exactly the internal diameter of the ring.

Bear in mind that if the ring you wish to order is very wide you will need to order one to two sizes bigger.

Finger sizes change depending on temperature. For instance during summer fingers get bigger by one or two sizes. It also much easier to enlarge, a ring, than to reduce it in size.

# Ring Sizer Belt

## 2nd Method

**1.** Download and print the ring sizer belt on A4 paper. Print scaling must be set to 100% and orientation to Landscape to ensure the ring sizer is the correct size

**2.** Measure the 100mm reference line on the print to ensure that the ring sizer is the correct scale

**3.** Cut out the ring sizer.

**4.** Carefully cut the slot - try folding the ring sizer belt lengthwise when you do this.

**5.** Push the narrow end through the slot to form a loop.

**6.** Adjust the ring sizer so that it sits comfortably round your finger.
